

Distribution Transformers

Our Product Range

Tanelec design and manufacture distribution transformers under licence to the world's leading transformer manufacturer, ABB, and utilizes the most up-to-date technology based on their vast experience and extensive ongoing research and development commitments. Our transformers comply with IEC standards.

We manufacture transformers up to 2500KVA at 33Kv which can be provided from our standard range or customized to suit customer needs and with a range of optional extras.

Only the best quality materials are used to ensure the highest possible quality.

At the end of the production process all our transformers are subjected to full routine tests including high voltage and performance efficiency tests.

Benefits

Tanelec transformers ensure:

- Minimal vibration and noise
- Excellent mechanical strength against short circuits
- High impulse withstanding capability
- Top quality powder paint surface finish
- Minimal maintenance requirements
- Long life expectancy

Optional Extras

- Conservator tanks
- Dehydrating breathers
- Pressure relief devices
- Buchholz relays
- Temperature indicators (with or without trips)
- Cable boxes
- Skids or rollers
